

Product ID:
RGRO10.5

Product Name:
10.5mm Kernmantle Rope

This static rope is highly abrasion resistant, very low stretch, maximum strength, extremely durable and has a long service life. This rope is suitable for many kinds of rope access and work positioning. It can also be used for rescue work, guide work, expeditions and caving. Can be used in conjunction with RGA14.

This static rope is highly abrasion resistant, very low stretch, maximum strength, extremely durable and has a long service life. This rope is suitable for all kinds of rope access and work positioning. It can also be used for rescue work, guide work, expeditions and caving.

- High grade polyamide
- Twisted cores
- Extra lightweight at high minimum breaking load
- High-twist 32-strand mantle braid > dirt resistance
- Good grip and high abrasion protection

Accredited to:
EN 1891A:1998

Material:
Polyamide outer sheath and twisted inner core

Stocked lengths:
700m
(loose in box)

Weight:
72g/m

MBS:
32kN

Max. force:
<6kN (when used with compatible device)
